California Arts Standards
California Arts Standards for Media Arts

“Media art can make the viewer an active participant. It can upend the roles of artist and spectator.”
—Rudolf Frieling, Curator of Media Arts, San Francisco Museum of Modern Art

The media arts standards are designed to enable students to achieve media arts literacy. Media arts standards assume the diverse forms and categories of media arts as a distinct, stand-alone arts discipline, whose basic categories include the following areas: photography, imaging, sound, animation, video, web design, graphic design, virtual design, interactive design, as well as their combinations and emerging forms, such as multimedia and virtual design.

What Is Literacy in Media Arts?

The standards for media arts do not address the use of specific media, rather they provide benchmarks that educators can adapt to specific media. Technology is embedded, integrated, or used as a tool in the media arts, but the emphasis is on process, so that the standards will remain relevant even as technology evolves.

Literacy in media arts is broad, diverse, and addresses creative, conceptual, and technical competencies that exist globally. Media arts are the emerging basis for communications, design, and social interaction in our increasingly digitally centered world, and California’s creative economy. Therefore, students should gain experience in production and design that has real-world relevance and applications that can include the following:

- **Multimedia Communication**: The ability to communicate and express in a variety of media forms or combined media, using various tools and processes, for specific purposes, intentions, and audiences.

- **Interdisciplinary Integration**: Media arts projects can incorporate multiple content areas and artistic disciplines, such as a video broadcast of student-produced documentaries, dramatic stories, and informational bulletins for the school campus.

- **Design Thinking**: A problem-based approach of producing iterations, prototypes, and models, which are repeatedly tested and revised and lead to a successful result.

- **Media and Digital Literacies**: Media arts students practice critical autonomy in discerning the quality and veracity of media. They are empowered in producing their own messages and products and in conscientious, civic-minded engagement in virtual environments.

Media arts classrooms come in many forms. They can be very active and dynamic, as well as quiet and focused. They will often use technology including a variety of emerging technologies, but in many classrooms, such as video production, animation, and game design, students will also be collaboratively engaged in brainstorming, writing, storyboarding or prototyping, and organizing their projects.

The enactment of standards can vary as well, depending on the specific form and the way projects are organized. The standards are designed to be flexible, with educators and teachers adapting the content to suit their classrooms and the needs of their students.
The enactment of standards can vary as well, depending on the specific form and the way projects are organized. The standards are presented in a linear, sequential format, but teachers should understand that they can access them in any order specific to their instructional approach. For example, lessons and units can easily begin by considering a given context (connecting), move next to analyzing examples of media arts (responding), then proceed to generating and refining (creating) a media artwork for presentation (producing). Also, the standards represent portions of the holistic creative process, and may be addressed in rapid-fire succession as one is creating work. Therefore, a brainstorming session that begins with creating the standard may also incorporate responding and even connecting standards. One well-structured project can address many, if not all, standards in a holistic, simultaneous manner.

Creating—Anchor Standard 1: Generate and Conceptualize Artistic Ideas and Work

*Process Component*

Conceive

*Enduring Understanding*

Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.

*Essential Questions*

- How do media artists generate ideas?
- How can ideas for media arts productions be formed and developed to be effective and original?

Connecting—Anchor Standard 11: Relate Artistic Ideas and Works with Societal, Cultural, and Historical Context to Deepen Understanding

Process Component

Relate

Enduring Understanding

Media artworks and ideas are better understood and produced by relating them to their purposes, values, and various contexts.

Essential Questions

• How does media arts relate to its various contexts, purposes, and values?
• How does investigating these relationships inform and deepen the media artist’s understanding and work?
Share ideas in relating media artworks and everyday life, such as daily activities.

Artworks in everyday life, such as popular media and connections with family and friends.

And ideas, such as media messages and media environments, relate to everyday life and culture.

And ideas relate to everyday life and culture and can influence values and online behavior.

Media artworks and ideas relate to personal, social, and community life, such as exploring commercial and information purposes, history, and ethics.

tools and environments, considering copyright, ethics, media literacy, and social media.

considering fair use and legal and technological contexts, considering ethics, media literacy, social media, and virtual worlds.

considering ethical, systemic, and vocational contexts of media arts, considering civic values, media literacy, social media, virtual environments, and digital identity.

considering ethical, systemic, and vocational contexts of media arts, considering civic values, media literacy, digital identity, and artist/audience interactivity.

The media arts terms defined in this section include only those terms that are underlined in the standards. The meaning of the terms is specific to their use in the standards and the artistic discipline. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions, most of which are provided by the National Coalition for Core Arts at https://www.nationalartsstandards.org/content/glossary.

**aesthetic principles:** Fundamental sensory quality or organizational rule within the diversity of media arts production and appreciation.

**attention:** Principle of directing perception through sensory and conceptual impact.

**balance:** Principle of the equitable and/or dynamic distribution of items in a media arts composition or structure for aesthetic meaning, as in a visual frame, or within game architecture.

**civic values:** Valuing the rights and well-being of individuals, collectives and community through tolerance, appreciation, open-mindedness; having a sense of duty at local to global levels, and awareness of power and predisposition to take action to change things for the better.

**components:** The discrete portions and aspects of media artworks, including: elements, principles, processes, parts, assemblies, etc. (such as: light, sound, space, time, shot, clip, scene, sequence, movie, narrative, lighting, cinematography, interactivity, etc.).

**composition:** Principle of arrangement and balancing of components of a work for meaning and message.

**concept modeling:** Creating a digital or physical representation or sketch of an idea, usually for testing; prototyping.

**constraints:** Limitations on what is possible, both real and perceived.

**context:** The situation surrounding the creation or experience of media artworks that influences the work, artist, or audience. This can include how, where, and when media experiences take place, as well as additional internal and external factors (personal, societal, cultural, historical, physical, virtual, economic, systemic, etc.).

**contrast:** Principle of using the difference between items, qualities, and components as a means to establish the relative size, significance, or strength of those items, qualities, or components.
contrast: Principle of using the difference between items, such as elements, qualities, and components, to mutually complement them.

convention: An established, common, or predictable rule, method, or practice within media arts production, such as the notion of a 'hero' in storytelling.

copyright: The exclusive right to make copies, license, and otherwise exploit a produced work.

design thinking: A cognitive methodology that promotes innovative problem solving through the prototyping and testing process commonly used in design.

digital identity: How one is presented, perceived, and recorded online, including personal and collective information and sites, e-communications, commercial tracking, etc.

divergent thinking: Unique, original, uncommon, idiosyncratic ideas; thinking "outside of the box."

emphasis: Principle of giving greater compositional strength to a particular element or component in a media artwork.

ethics: Moral guidelines and philosophical principles for determining appropriate behavior within media arts environments.

exaggeration: Principle of pushing a media arts element or component into an extreme for provocation, attention, contrast, as seen in character, voice, mood, message, etc.

experiential design: Area of media arts wherein interactive, immersive spaces and activities are created for the user; associated with entertainment design.

fairness: Complying with appropriate, ethical, and equitable rules and guidelines.

fair use: Permits limited use of copyrighted material without acquiring permission from the rights holders, including commentary, search engines, criticism, etc.

force: Principle of energy or amplitude within an element, such as the speed and impact of a character’s motion.

generative methods: Various inventive techniques for creating new ideas and models, such as brainstorming, play, open exploration, prototyping, experimentation, inverting assumptions, rule-bending, etc.

hybridization: Principle of combining two existing media forms to create new and original forms, such as merging theatre and multimedia.

interactivity: A diverse range of articulating capabilities between media arts components, such as user, audience, sensory elements, etc., that allow for inputs and outputs of responsive connectivity via sensors, triggers, interfaces, etc., and may be used to obtain data, commands, or information and may relay immediate feedback, or other communications; contains unique sets of aesthetic principles.

juxtaposition: Placing greatly contrasting items together for effect.
juxtaposition: Placing greatly contrasting items together for effect.

legal: The legislated parameters and protocols of media arts systems, including user agreements, publicity releases, copyright, etc.

manage audience experience: The act of designing and forming user sensory episodes through multi-sensory captivation, such as using sequences of moving image and sound to maintain and carry the viewer’s attention, or constructing thematic spaces in virtual or experiential design.

markets: The various commercial and informational channels and forums for media artworks, such as television, radio, internet, fine arts, nonprofit, communications, etc.

meaning: The formulation of significance and purposefulness in media artworks.

media environments: Spaces, contexts, and situations where media artworks are produced and experienced, such as in theaters, production studios, and online.

media literacy: A series of communication competencies, including the ability to access, analyze, evaluate, and communicate information in a variety of forms, including print and nonprint messages (National Association for Media Literacy Education n.d.).

media messages: The various artistic, emotional, expressive, prosaic, commercial, utilitarian, and informational communications of media artworks.

movement: Principle of motion of diverse items within media artworks.

multimodal perception: The coordinated and synchronized integration of multiple sensory systems (vision, touch, auditory, etc.) in media artworks.

multimedia theatre: The combination of live theatre elements and digital media (sound, projections, video, etc.) into a unified production for a live audience.

narrative structure: The framework for a story, usually consisting of an arc of beginning, conflict, and resolution.

personal aesthetic: An individually formed, idiosyncratic style or manner of expressing oneself; an artist’s “voice.”

perspective: Principle pertaining to the method of three-dimensional rendering, point-of-view, and angle of composition.

point of view: The position from which something or someone is observed; the position of the narrator in relation to the story, as indicated by the narrator’s outlook from which the events are depicted and by the attitude toward the characters.

positioning: The principle of placement or arrangement.

presentation: A diverse range of activities of exhibiting media artworks, which can include sharing, distributing, installing, publishing, broadcasting, posting, showing, performing, etc.

production processes: The diverse processes, procedures, or steps used to carry out the construction of a media artwork, such as prototyping, playtesting, and architecture construction in game design.
production processes: The diverse processes, procedures, or steps used to carry out the construction of a media artwork, such as prototyping, playtesting, and architecture construction in game design.

prototyping: Creating a testable version, sketch, or model of a media artwork, such as a game, character, website, application, etc.

resisting closure: Delaying completion of an idea, process, or production, or persistently extending the process of refinement, towards greater creative solutions or technical perfection.

responsive use of failure: Incorporating errors towards persistent improvement of an idea, technique, process, or product.

rules: The laws or guidelines for appropriate behavior; protocols.

safety: Maintaining proper behavior for the welfare of self and others in handling equipment and interacting with media arts environments and groups.

soft skills: Diverse organizational and management skills useful to employment, such as collaboration, planning, adaptability, communication, etc.

stylistic convention: A common, familiar, or even “formulaic” presentation form, style, technique, or construct, such as the use of tension-building techniques in a suspense film, for example.

systemic communications: Socially or technologically organized and higher-order media arts communications such as networked multimedia, television formats and broadcasts, “viral” videos, social multimedia (e.g., “vine” videos), remixes, transmedia, etc.

systems: The complex and diverse technological structures and contexts for media arts production, funding, distribution, viewing, and archiving.

technological: The mechanical aspects and contexts of media arts production, including hardware, software, networks, code, etc.

tone: Principle of “color” “texture” or “feel” of a media arts element or component, as for sound, lighting, mood, sequence, etc.

transdisciplinary production: Accessing multiple disciplines during the conception and production processes of media creation, and using new connections or ideas that emerge to inform the work.

transmedia production: Communicating a narrative and/or theme over multiple media platforms, while adapting the style and structure of each story component to the unique qualities of the platforms.

virtual channels: Network-based presentation platforms such as YouTube, Vimeo, DeviantArt, etc.

virtual worlds: Online, digital, or synthetic environments (e.g., Minecraft, Second Life).

vocational: The workforce aspects and contexts of media arts.
vocational: The workforce aspects and contexts of media arts.
