California Arts Standards

California Arts Standards for Visual Arts

“Every child is an artist. The problem is how to remain an artist once we grow up.”

—Pablo Picasso (1881–1973), Spanish painter, sculptor, printmaker, ceramicist, stage designer, and playwright

The visual arts standards are designed to enable students to achieve visual arts literacy and develop technical artistic skills. Visual arts include the traditional fine arts such as drawing, painting, ceramics, metals, printmaking, fiber arts, photography, sculpture, works in wood, and mixed media; architectural, environmental, and industrial arts, such as urban interior, product, and landscape design; and folk art, which was historically defined by “originating from, or traditional to the common people of a country” (Collins English Dictionary 2019). Today both formally and nonformally trained artists work in folk art media celebrating rich cultural traditions.

What Is Literacy in Visual Arts?

In the visual arts, developing literacy occurs as a result of engaging in an authentic creative process through the use of traditional and nontraditional materials and applying the formal elements of art and principles of design; knowing an arts language to describe art; and discovering the expressive qualities of art to be able to reflect, critique, and connect personal experience to art.

The visual arts standards describe expectations for learning in the visual arts regardless of style or genre. The standards impart the breadth and depth of the visual art experience through the art-making process. The standards serve as an impetus for arts educators and administrators to inspire, support, and develop their students in the many facets of visual

VISUAL ARTS

arts so they are prepared for a lifelong appreciation, understanding, engagement and, if pursued, additional study towards a career in visual arts.

Like the other disciplines, the four artistic processes of visual arts (creating, presenting, responding, and connecting) are addressed linearly in written standards, but are envisioned to occur simultaneously for students in the actual practice of visual art. The concepts embedded in the standards reflect the scope of learning—the knowledge, skills, and understandings—taught through study of the visual arts. An artist imagines, executes, reflects, and refines work before finally completing a piece of work (creating), shares or displays the work (presenting), reflects on the completed work (responding), and connects the experience to other contexts of meaning or knowledge (connecting). Students engaging in the artistic process learn by solving problems, exhibiting their work, and thinking critically about it; then, they continue the process by relating other ideas, contexts, and meanings to their own as they refine their future work to a more sophisticated level.

Visual Arts Glossary

The visual arts terms defined in this section include only those terms that are underlined in the standards. The meaning of the terms is specific to their use in the standards and the artistic discipline. The definitions included here are not meant to be an exhaustive list or used as curriculum.

The following defined terms are commonly accepted definitions, most of which are provided by the National Coalition for Core Arts at <https://www.nationalartsstandards.org/content/glossary>.

appropriation: Intentional borrowing, copying, and alteration of preexisting images and objects.

art: In everyday discussions and in the history of aesthetics, multiple (and sometimes contradictory) definitions of art have been proposed. In a classic article, “The Role of Theory in Aesthetics,” Morris Weitz (1956) recommended differentiating between classificatory (classifying) and honorific (honoring) definitions of art.

In the California Arts Standards, the word art is used in the classificatory sense to mean “an artifact or action that has

In the California Arts Standards, the word art is used in the classificatory sense to mean “an artifact or action that has been put forward by an artist or other person as something to be experienced, interpreted, and appreciated.”

An important component of a quality visual arts education is for students to engage in discussions about honorific definitions of art—identifying the wide range of significant features in art-making approaches, analyzing why artists follow or break with traditions and discussing their own understandings of the characteristics of “good art.”

artist statement: Information about context, explanations of process, descriptions of learning, related stories, reflections, or other details in a written or spoken format shared by the artist to extend and deepen understanding of his or her artwork; an artist statement can be didactic, descriptive, or reflective in nature.

artistic investigations: In making art, forms of inquiry and exploration; through artistic investigation artists go beyond illustrating pre-existing ideas or following directions, and students generate fresh insights—new ways of seeing and knowing.

art-making approaches: Diverse strategies and procedures by which artists initiate and pursue making a work.

artwork: Artifact or action that has been put forward by an artist or other person as something to be experienced, interpreted, and appreciated.

brainstorm: Technique for the initial production of ideas or ways of solving a problem by an individual or group in which ideas are spontaneously contributed without critical comment or judgment.

characteristic(s): Attribute, feature, property, or essential quality.

characteristics of form (and structure): Terms drawn from traditional, modern, and contemporary sources that identify the range of attributes that can be used to describe works of art and design to aid students in experiencing and perceiving the qualities of artworks, enabling them to create their own work and to appreciate and interpret the work of others.

collaboratively: Joining with others in attentive participation in an activity of imagining, exploring, and/or making.

concepts: Ideas, thoughts, schemata; art arising out of conceptual experimentation that emphasizes making meaning through ideas rather than through materiality or form.

constructed environment: Human-made or modified spaces and places; art and design-related disciplines such as architecture, urban planning, interior design, game design, virtual environment, and landscape design shape the places in which people live, work, and play.

contemporary artistic practice: Processes, techniques, media, procedures, behaviors, actions, and conceptual approaches by which an artist or designer makes work using methods that, though they may be based on traditional practices, reflect changing contextual, conceptual, aesthetic, material, and technical possibilities; examples include artwork made with appropriated images or materials, social practice artworks that involve the audience, performance art, new media works, installations, and artistic interventions in public spaces.

contemporary criteria: Principles by which a work of art or design is understood and evaluated in contemporary contexts which, for example, include judging not necessarily on originality, but rather on how the work is re-contextualized to create new meanings.

which, for example, include judging not necessarily on originality, but rather on how the work is re-contextualized to create new meanings.

context: Interrelated conditions surrounding the creation and experiencing of an artwork, including the artist, viewer/audiences, time, culture, presentation, and location of the artwork's creation and reception.

copyright: Form of protection grounded in the US Constitution and granted by law for original works of authorship fixed in a tangible medium of expression, covering both published and unpublished works.

Creative Commons: Copyright license templates that provide a simple, standardized way to give the public permission to share and use creative work on conditions of the maker's choice (<http://creativecommons.org/>).

criteria: In art and design, principles that direct attention to significant aspects of a work and provide guidelines for evaluating its success.

critique: Individual or collective reflective process by which artists or designers experience, analyze, and evaluate a work of art or design.

cultural contexts: Ideas, beliefs, values, norms, customs, traits, practices, and characteristics shared by individuals within a group that form the circumstances surrounding the creation, presentation, preservation, and response to art.

cultural traditions: Pattern of practices and beliefs within a societal group.

curate: Collect, sort, and organize objects, artworks, and artifacts; preserve and maintain historical records and catalogue exhibits.

curator: Person responsible for acquiring, caring for, and exhibiting objects, artworks, and artifacts.

design: Application of creativity to planning the optimal solution to a given problem and communication of that plan to others.

digital format: Anything in electronic form including photos, images, video, audio files, or artwork created or presented through electronic means; a gallery of artwork viewed electronically through any device.

established criteria: Identified principles that direct attention to significant aspects of various types of artwork in order to provide guidelines for evaluating the work; these may be commonly accepted principles that have been developed by artists, curators, historians, critics, educators, and others or principles developed by an individual or group to pertain to a specific work of art or design.

exhibition narrative: Written description of an exhibition intended to educate viewers about its purpose.

expressive properties: Moods, feelings, or ideas evoked or suggested through the attributes, features, or qualities of an image or work of art.

fair use: Limitation in copyright law which sets out factors to be considered in determining whether or not a particular use of one's work is "fair," such as the purpose and character of the use, the amount of the work used, and whether the use will affect the market for the work.

will affect the market for the work.

formal and conceptual vocabularies: Terms, methods, concepts, or strategies used to experience, describe, analyze, plan, and make works of art and design drawn from traditional, modern, contemporary, and continually emerging sources in diverse cultures.

found object: The use of man-made or natural objects not normally considered traditional art materials. Found objects are transformed by changing meaning from their original context. The objects can be used singly or in combination (e.g., assemblage or installation).

genre: Category of art or design identified by similarities in form, subject matter, content, or technique.

image: Visual representation of a person, animal, thing, idea, or concept.

imaginative play: Experimentation by children in defining identities and points of view by developing skills in conceiving, planning, making art, and communicating.

installation art: Art designed to exist in a site-specific location whether inside or outside, public or private. Contemporary art installation materials can range from everyday objects and natural materials to new and alternative media. Often the viewer walks into the installation space and is surrounded by the art.

material culture: Human-constructed or human-mediated objects, forms, or expressions, that extend to other senses and study beyond the traditional art historical focus on the exemplary to the study of common objects, ordinary spaces, and everyday rituals.

materials: Substances out of which art is made or composed, ranging from the traditional to “nonart” material and virtual, cybernetic, and simulated materials.

media: Mode(s) of artistic expression or communication; material or other resources used for creating art.

open source: Computer software for which the copyright holder freely provides the right to use, study, change, and distribute the software to anyone for any purpose (<https://opensource.org/>).
